

VIT[®]

Vellore Institute of Technology
(Deemed to be University under section 3 of UGC Act, 1956)

Name – Vedansh Joshi

Reg no – 19MCA1006

Course code – ITA6009

Faculty – Dr. S.Kirthica

Problem Handled –

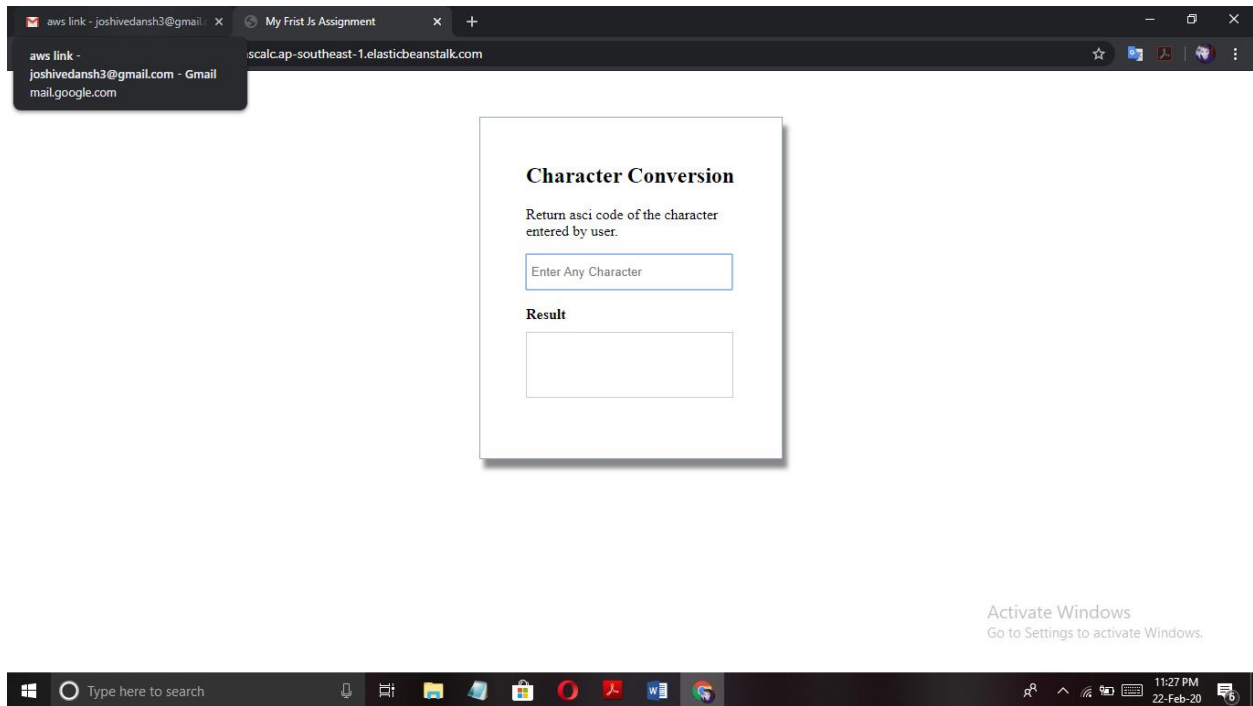

ASCII is used to translate computer text to human text. All computers speak in binary, a series of 0 and 1. However, just like English and Spanish can use the same alphabet but have completely different words for similar objects, computers also had their own version of languages. ASCII is used as a method to give all computers the same language, allowing them to share documents and files. ASCII is important because the development gave computers a common language.

Code:-

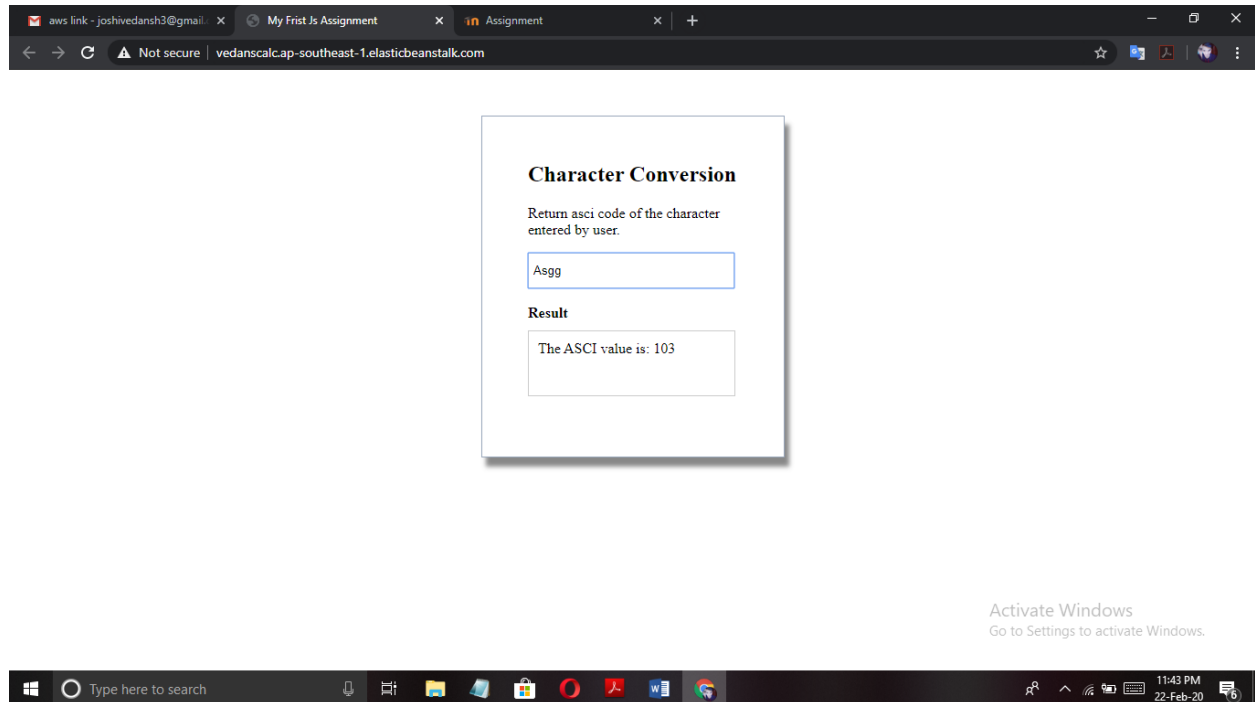

```
<html>
<head>
<title>My Frist Js Assignment</title>
<script>
function printAsscii(event) {
var x = event.keyCode;
document.getElementById("result").innerHTML = "The ASCI value is: " + x;
}
</script>
</head>
<body>
<div style="border:1px solid #0256;width:230px;margin:0 auto;margin-top:50px;padding:50px;box-shadow: 5px 10px 5px #888888">
<h2 style="margin-top:0px;">Character Conversion </h2>
<p> Return asci code of the  character entered by user.</p>
<form>
<input style="height: 39px;
padding: 5px;
border: 1px solid #cccc;
width: 226px;" type="text" id="input_field" onkeypress="printAsscii(event)"
placeholder="Enter Any Character" />
<br />
<br />
<label><b>Result</b></label>
<br />
<div id="result" style="padding:10px;border: 1px solid #ccc;width:
205px;height: 50px;margin-top: 10px;"></div>
</form>
</div>
</body>
```

</html>
